Message from the Chairman

Throughout the 25 years operating businesses in Thailand, the Group has developed several types of projects in various areas of business. Some of them are mega projects which the Group had to invest its own resources. Developing projects always come along with many problems and obstacles to go through. Once the time has passed, some projects fail, some succeeded. There is one thing everyone should realize apart from achievements it is How to Work.

If we work professionally and **if we rely on the accuracy principle in every action**, we will get strong and stable outcomes. **No matter what we think, say, or do, accuracy will allow the job to be done** either in that moment or in the future.

If all employees are adhering to this principle in working, all jobs can be combined to have a great outcome. With this, **the organization will be immune, grow steadily and be a good organization along with the growth of the society**

With the above, the Group places the utmost importance to encourage employees to abide by the laws and be good citizens of the country and encourage our business partners to conduct business legally and with transparency. The Company has joined the Declaration of Intent in view of establishing Thai Private Sector Collective Action Against Corruption with the leading private sectors in Thailand. This declares the intents of BTS Group in operating its businesses in accordance with the international framework and procedure standard.

The Group believes that everyone has performed very well, but to be clear with our guidelines, the Group has set a written Anti-Corruption Measures (consolidated version) to ensure that the Group has proper policies, guidelines, and regulations as a tool to prevent corruption from all business transactions, as well as to be in line with the Declaration of Intent in View of Establishing Thai Private Sector Collective Action Against Corruption.
